I request assistance in resolving the following problem I am having with:

Environmental Protection Agency

Explanation of the problem:

EPA Acting CFO David Bloom moves government contract work that had previously been awarded to Hub-zone and then to small business to large business to steer the contract towards his friends that have held the contract work under him and his associate CFO Carol Terris for over 20+ years. When vendors competing for the contract in calendar year 2019 asked how come this work was being moved from the small business arena to the large business area, even though capable small business could perform the work. Mr. Blooms Office refuse to acknowledge the questions to ensure his friends at Key logic could complete for the contract work and eventually be awarded the work. During the competitive competition for the contract work capable vendors able to perform the work, provided a cost that was less than the cost provided by Mr. Blooms friends at Key Logic. While I did not participate in this contract solicitation, I am aware of several Maryland based small disadvantaged minority business that spent their company funds preparing for this competition hoping that they would have a fair opportunity to compete for this federal government work at the EPA. I would like for your office to look into this unfair procurement practice at the EPA and understand how the EPA administrator plans to stop this illicit behavior conducted by his Acting CFO.

I have included a document that provides a more detailed description of Mr. Blooms activity
